SUMMARY

Computer Science student specializing in cybersecurity, with practical learning experience in Security Operations Center (SOC) workflows, vulnerability assessment, penetration-testing fundamentals, and AI-driven security applications. Interested in identifying security risks, analysing potential threats, and understanding remediation strategies. Building expertise in Blue Team operations, threat detection, incident response, Python, and security automation. Seeking SOC Analyst, Cybersecurity Analyst, or Ethical Hacking opportunities.

TECHNICAL SKILLS

Security: Vulnerability Assessment, VAPT Fundamentals, Threat Analysis, Security Monitoring, Incident Response Fundamentals, Network Security, Web Application Security, System Hardening
Tools: Nmap, Wireshark, Burp Suite, Metasploit, Kali Linux, OWASP ZAP, Nessus
Languages: Python, C, Java, SQL | **Cloud:** Microsoft Azure, IBM Cloud, Azure DevOps, CI/CD
AI: Generative AI, Machine Learning Fundamentals, LLM Applications, RAG, LangChain
Other: Linux, Networking, HTML, CSS, JavaScript, Database Management

EXPERIENCE

Tekloomy (OPC) Pvt. Ltd. **Mumbai, India**
Cybersecurity Intern *Oct 2026 – Present*
- Developing practical cybersecurity knowledge through internship activities focused on security concepts and defensive practices.

ApexPlanet Software Pvt. Ltd. **Mumbai, India**
Cybersecurity & Ethical Hacking Intern *Jul 2026 – Sep 2026*
- Practiced vulnerability scanning, network analysis, and penetration-testing fundamentals in a structured cybersecurity learning environment.
- Worked with Kali Linux, Nmap, Wireshark, and Metasploit while developing security reporting and system-hardening skills.

Lenovo LEAP **Mumbai, India**
Generative AI & Agentic Systems Engineering Intern *Jun 2026 – Jul 2026*
- Explored Generative AI and agentic system architectures, their applications, and AI-assisted pattern detection and automated reporting.
- Completed guided exercises and projects focused on emerging AI technologies and practical problem-solving.

PROJECTS

- **PhishShield AI** | Python, NLP, Machine Learning *Jun 2026*
  - Developed an AI-based phishing detection application for analysing URLs and email content using machine-learning and NLP techniques.
  - Designed a feature-extraction workflow to support phishing classification and analysis.
- **Network Intrusion Detection System** | Python, Machine Learning *Dec 2025*
  - Developed a machine-learning-based intrusion detection project to analyse network activity and identify potential anomalies.
- **Packet Sniffer Tool** | Python, Scapy, Networking *May 2026*
  - Built a packet-capture tool to inspect network traffic and examine protocols for networking and security analysis.
  - Implemented traffic filtering and inspection functionality for network monitoring.
- **SOC Automation Lab** | Python, Elastic Stack, SIEM *Jan 2026*
  - Explored security-log analysis, alert triage, and Python-based automation workflows for SOC monitoring and incident analysis.

EDUCATION

Keraleeya Samajam's Model College (Autonomous) Mumbai, India
Bachelor of Science in Computer Science July 2024 – April 2027 (Expected)
Relevant Coursework: Cybersecurity Fundamentals, Network Security, Operating Systems, Cryptography, Database Management

CERTIFICATIONS

Cisco Junior Cybersecurity Analyst | **Introduction to Cybersecurity** | **Cisco Networking Essentials** | **Trust and Security with Google Cloud** | **RAG with LangChain**
